

Le Petit Tuto : Passez en mode « invisible »

The image shows a sequence of three screenshots from the LinkedIn mobile app, illustrating how to set a profile to 'invisible' mode. Red arrows and numbers 1, 2, 3, and 4 indicate the steps:

- 1:** Points to the 'Préférences et confidentialité' (Preferences and privacy) option in the 'Compte' (Account) section of the profile page.
- 2:** Points to the 'Voir le profil' (View profile) button at the bottom of the profile page.
- 3:** Points to the 'Visibilité' (Visibility) option in the 'Settings' menu.
- 4:** Points to the 'Affichage du profil' (Profile display) section in the 'Visibilité de votre profil et de votre réseau' (Visibility of your profile and network) settings.

In the 'Affichage du profil' screen, two options are shown:

- Caractéristiques du profil privé** (Private profile features): A person who studied at Grenoble IAE.
- Mode privé** (Private mode): You will be in full private mode.

A red box highlights the text: "Vous choisissez ce qui va apparaître entre les 2 options" (You choose what will appear between the 2 options).
